

PROFESSIONAL FLOORING INSTALLATION KIT

- Includes all the tools needed to install plank flooring
- **PFIK** includes:
 - (1) **STB8** Stepped Tapping Block is used to tightly fasten plank flooring together without damage and features a multi-sided design that is compatible with most plank flooring types
 - (1) **PPB14** Pro Pull Bar is used to tightly fasten plank flooring together in areas where a tapping block won't fit, like against walls and under toe kicks and features felt backing to protect the floor from scratches
 - (30) **3SPS** 3-Sided Pro Spacers are used to provide the correct spacing between the flooring being installed and walls and require half as many spacers as wedges
 - (1) Dual-sided mallet features a yellow tip for use with laminate and hardwood flooring and a black tip for glued or click-lock vinyl
- Individual items can be purchased separately

Stepped Tapping Block

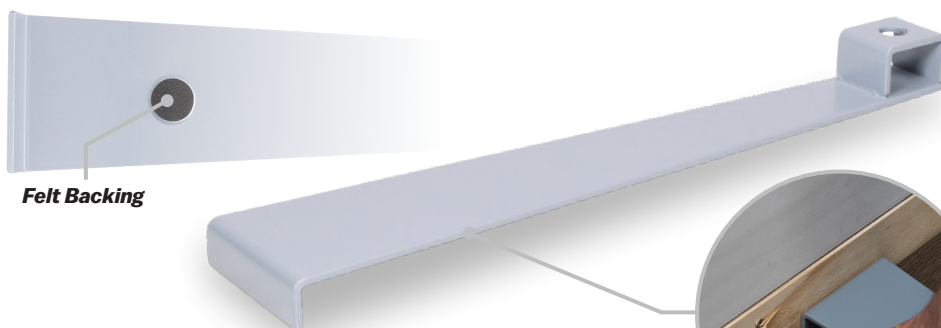

- Pushes the tongue-and-groove or edges of resilient vinyl tile, laminate, or hardwood flooring planks together to create a tight seam
- Versatile multi-sided design is compatible with most plank flooring types
- Built with durable materials for long-lasting performance
- For use with a soft face mallet only to protect flooring; never use a metal hammer
