

***gatorback*®** **MORTAR BOARD**

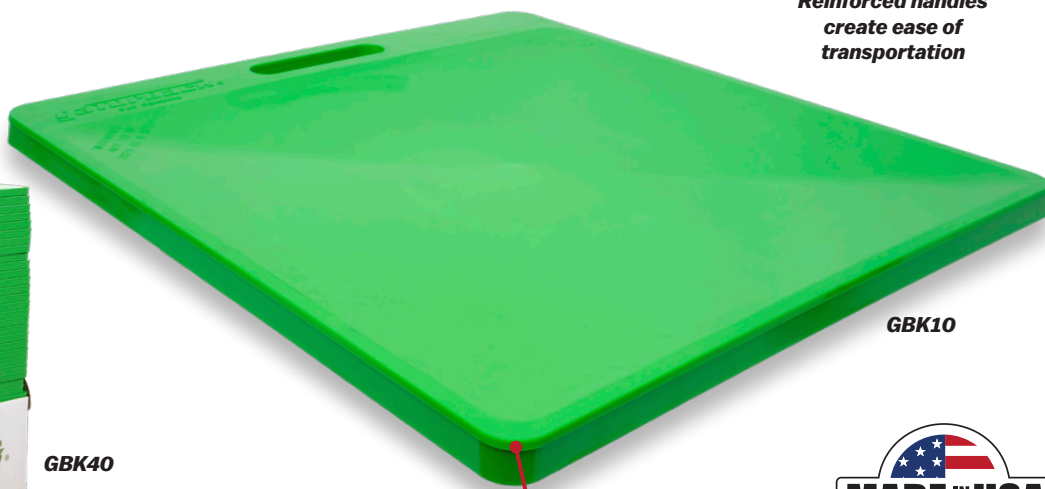

- Designed to easily hold and transport mortar, plaster, or stucco
- Durable impact-resistant board is nearly indestructible and will not dent or rust
- Engineered to carry up to 150lbs of material with minimal flex
- Water and UV-resistant polymer plastic won't conduct heat or absorb water, helping your material retain moisture and extend workability
- Reinforced handles create ease of transportation
- Weighs only 5½ lbs; workers can carry multiple boards at once for faster setup

Rib structure enables board to hold 150lbs with less than 1" (25mm) flex

Reinforced handles create ease of transportation

GBK40

GBK10

Board surface is 3/16" (5mm) thick
